This female bust by Franz Hagenauer is one of a group of sculptures executed by Werkstatte Hagenauer in the late 1970s and early 1980s. The highly reduced facial features are a distinctive stylistic element of Prof. Franz Hagenauer.

Particularly noteworthy are the fine soldered hairs, which complement the overall appearance of the sculpture with their dynamic nature. The extraordinary size and the almost perfect workmanship make it a true masterpiece. This work of art is a prime example of Franz Hagenauer's design genius.
