

JUGENDSTIL PANEL "ALLEGORY OF FLORA" GEORG KLIMT CA. 1900

€38.000,00

Jugendstil panel "Allegory of Flora", Georg Klimt (1867
- 1931), ca. 1900

Dimensions

30 × 3 × 41,5 cm

This relief stands out as an exceptional work of metal art, clearly reflecting the influence of the Glasgow School. The execution is remarkably refined, with an extraordinary sensitivity for detail — every line and surface is handled with great precision, giving the piece both depth and a quiet, almost sculptural presence. Among the works we have encountered, it is certainly one of the most accomplished.

The condition is very good, with parts of the silvering carefully refreshed.
