

VASE LOETZ CYTISUS NEUROTH CA. 1902

Vase, Johann Loetz Witwe, Cytisus Neuroth
decoration, ca. 1902

Dimensions

7,5 × 7,5 × 20 cm

The secessionist artistic taste at the beginning of the 20th century is exemplarily reflected in this design.

The colorful "Cytisus" decoration shimmers on its distinctive underlay in the color "Neuroth". The dynamic curves and indents of the shape of the vase particularly accentuate the iridescence of the silver crumbled dots.

Our excellently preserved vase represents one of the most creative phases of the Bohemian glass manufacturer Loetz.
