

**N. D. C. M. FRÖHLICH "POLAR  
LOVE"**

**€7.500,00**

---

This collage executed in high-quality "Giclée" technique is one of originally 8 motifs from the series "Gold". The polar bears embracing each other in the foreground open a content ambiguity created deliberately by the artist. Whether the protagonists of this work are actually embracing or fighting with each other is left to the interpretation of the viewer. Through the special "giclée" process, the colors are expressed with particular luminosity. Another characteristic aspect of the artist's oeuvre is the radiant, golden background, which is hand-applied by the artist in each of his works.
