This vase, designed by Jutta Sika and Leopold Bauer for the glass company *E. Bakalowits Söhne*, is characterised by its clear and strictly cubic form. Jutta Sika, a pupil of Josef Hoffmann and co-founder of the Association of Viennese Art in the House, designed the decoration for this vase. It is characterised by a skilful interplay of blue and yellow tones, which lends the strict cube a playful touch. Leopold Bauer designed the cubic shape - it is exemplary of his architectural oeuvre. The unique interplay of playful decoration and clear design language gives this vase an unrivalled charm.
