There is an ongoing debate about whether Loetz vases should be used as flower vases or not. Are they functional objects or works of art that are better kept safely in a display case? We believe that these two aspects are not mutually exclusive. In the case of our “tree vase,” the decision is easy for us, because it is not only decorative but also functional – the many holes in the glass balls invite you to fill it with flowers and get creative yourself. The symbiosis between glass and plants makes this art object particularly unique and attractive.
