The iconic “Cytisus” decoration – shown here in the rare “Maigrün” color variation – is one of the most popular decorative variations from the Johann Loetz Witwe glassworks. It is complemented by finely twisted threads that evoke a fascinating sense of depth. Silver dots on the iridescent surface add sparkling accents and emphasize the elegant aura of our beautiful vase. Particularly noteworthy are the three handles drawn from the glass mass, which nestle organically against the bulbous shape and lend it a sculptural dynamism. This art glass combines masterful craftsmanship with the elegance of the Viennese Secession style.
