The sight of this small vase is a delight for the art-loving eye. Both as a pair with its large counterpart and individually, it stands out with its immense luminosity. Depending on the incidence of light, the harmonious combination of the elegantly curved vase body with its shimmering gold decoration displays a color spectrum ranging from silver-yellow to violet and blue. This decoration is particularly well accentuated by the organically curved basic shape with its expressively curved, triple-folded mouth. This makes it possible to experience the beauty of the silver- yellow interior of the vase even from a distance. This outstanding work of glass art is destined for a true Art Nouveau heart.
