This elegantly curved vase with its luminous gold shimmering decoration gives it a fascinating appearance. The applied dots evoke images of water lilies, whose color spectrum ranges from silver-yellow to violet and blue depending on the incidence of light. The vertically drawn silver-blue threads emphasize the presence and size of the 31cm high body of the vase.

The iridescent decoration is accentuated particularly by the organically curved basic form with its triple folded and expressively curved mouth. It allows us to experience the beauty of the vase's silver-yellow interior even from a distance. This exquisite work of art glass is destined for a true Art Nouveau heart.
